

Eskimo Acute Lotion

Moisturizes and soothes dry and itching skin

Body lotion with 1.5 % Polidocanol and natural plant oils. Moisturizes and soothes dry and itching skin, especially for neurodermatitis. Polidocanol is a fatty alcohol that is used in the field of dermatology for easing the pruritus. Urea cares for a natural preservation of the skin's moisture. Additionally the contents of the balloon plant (*Cardiospermum halicacabum*) protect and resonate irritated skin, valuable nutrients of the viper's bugloss oil and sunflower oil strengthen the skin barrier. A very skin-friendly lotion, that spreads easily and is absorbed fast. Without any scents and dye stuffs.

Usage: Apply the lotion thin on the affected skin area and spread it. If required use it several times daily.

Ingredients: Aqua, Urea, Cetearyl Alcohol, Octyldodecanol, Glycerin, Tocopherol, Laureth-9, Echium Plantagineum Seed Oil, *Cardiospermum Halicacabum* Flower/Leaf/Vine Extract, *Helianthus Annuus* Seed Oil Unsaponifiables, Potassium Sorbate, Citric Acid, Sodium Cetearyl Sulfate, Benzyl Alcohol.
