

## Argan Oil Cream

This wonderfully rich face cream pampers the skin with its luxurious combination of argan oil and other precious nut oils, such as macadamia and kukui nut oil. In their countries of origin, these are regarded as the secret of beauty. When combined together, they provide the skin with nourishing and protective care which pampers the skin as soon as the cream is applied, primarily due to the active unsaturated fatty acids which they contain. A special extract from the leaves of the argan tree also provides antioxidant support. The delicate, natural fragrance sensually rounds off the valuable skin care.
