

Crystal Bath Salts

from the pakistani
“Salt Range”,
about 200 km south of Himalaya

Crystal bath salts from one of the oldest salt sources on Earth, extracted in the “Salt range” in the Pakistani province of Punjab, approximately 200 km south of **the Himalayas**. 100% natural, free of any additives, hand-selected. Ideal both for bathing and for the preparation of drinking brine. A brine bath with this crystal bathing salt has a cleansing, deeply-relaxing effect on the entire organism. Contains a large quantity of minerals and trace elements, and is therefore highly suitable for flaky, dry, skin.

To obtain an ideal dissolution of the bath salt it is recommended to first dissolve the whole bag contents in hot water before adding warm water until a comfortable bathing temperature is reached.

Country of origin: Pakistan/Salt Range.

Ingredients: Sodium Chloride

Contents 3 x 1000 g

Art. No. 219

Fo0619
