

## tierlieb Omega 3 Sea Fish Oil

Feed for dogs and cats

### Useful information:

This valuable oil made from Atlantic and Pacific sea fish is characterised by its high levels of Omega 3 fatty acids eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). These vital fatty acids are essential, and cannot be formed as part of natural metabolic processes. In particular during phases of increased requirement such as during coat change and growth, and in old age, a supplement with EPA and DHA supports normal, healthy lipid metabolic processes, which are then able to provide sufficient energy in all phases of life.

The high-quality Tierlieb Omega 3 Sea Fish Oil contains multiple times the proportion of these valuable unsaturated fats in comparison to many oils from aquaculture and can, therefore, be administered very sparingly.

- High natural EPA (18 %) and DHA (12 %) content
- Popular for biological raw feed appropriate to the species (BARF)
- A valuable supplement during growth and for elderly animals
- Essential nutrients for heart, skin and fur

**Composition:** 100 % natural fish oil (salmon and herring varieties).

**Analytical contents:** Fat content 100 %. Metabolisable energy: 35.5 MJ/kg (924 kcal/100 ml).

Essential fatty acid content:

Total Omega 3 fatty acids	30 %
EPA (eicosapentaenoic acid)	18 %
DHA (docosahexaenoic acid)	12 %

### Feed recommendation / day:

Mix the recommended quantity into the feed.

Cats: 1-2 drops per 1 kg body weight

Dogs up to 20 kg: ½-1 teaspoon (approx. 1.5-3 ml)

Dogs from 20 kg: 1-2 teaspoons (approx. 3-6 ml)

Double the quantity can be fed in case of increased requirements or an existing deficit.

Please store opened bottles in the refrigerator.
