

Green-lipped Mussel Cat Capsules

Single feed for joints and cartilage
Full fat quality

Good to know:

The New Zealand green-lipped mussel (*Perna canaliculus*) contains so-called glycosaminoglycans (GAG). These are substance connections which serve as structural substances, predominantly in the articular cartilage. Green-lipped mussel meat contains a relatively high proportion of natural taurine, an amino acid essential for cats.

Composition:

Each capsule contains 500 mg New Zealand green-lipped mussel concentrate 100%.

Analytical contents:

crude protein 66.8 %, crude fat 10.5 %, crude ash 6.8 %, crude fibre 1.1 %.

	per kg	per capsule
Green-lipped mussel concentrate	1000 g	500 mg
of which glycosaminoglycans	30 g	15 mg
of which taurine	24 g	12 mg

Feed recommendation:

Add 1 capsule daily to feed.

Open the capsule and mix the content into the food.

Keep dry and out of direct sunlight. Store below 25°C.
