Intestinal Regulator for Cats

Probiotic nutritional supplement for the digestion

Useful information:

Diseases, worm treatments or courses of antibiotics can cause disturbance to the intestinal flora in cats. Intestinal regulator for cats helps stabilise the digestion in case of disruption to the gastrointestinal tract. The probiotic bacteria contained in the product supports the optimal digestion of food. The vegetable-based prebiotic components promote a positive composition of the intestinal flora. Pollutants are absorbed by the mineral clinoptilolith and gently channeled out.

- Regulates the inner condition
- With intestinal flora stabiliser *Enterococcus faecium*

Analytical contents: Crude protein 1.9 %, crude fat 1.3 %, crude ash 6.6 %, crude fibre 0.4 %.

Composition: Inulin (from chicory roots), apple pectin, yeasts, magnesium salts from fatty acids.

Zootechnical additive per kg: *Enterococcus faecium* DSM 10663/NCIMB 10415 2.6 * 10¹² KBE

Technological additive per kg: Clinoptilolith of sedimentary origin 50,000 mg.

Feed recommendation:

Open 1 capsule 1-2 times per day and mix the contents into cat food. Feed for up to 4 weeks as prevention or during or after digestion problems. Ask a vet for advice before use or before extending the period of use. Intestinal regulator can be combined very well with other Kräuterhaus products for cats.

Keep dry and out of direct sunlight. Store below 25°C.
