

tierlieb Taurine Powder

Nutritional supplement for cats and dogs

Useful information:

Taurine is a sulphurous amino acid with important functions in the central nervous system and during development. Taurine also contributes towards the control of the body temperature and the retention of good eyesight. A taurine deficit can have severe consequences on cats. The risk of a deficit results if cats are fed self-prepared feed (BARF), dog food or are fed mainly plant-based products. In certain cases, dogs may also require a nutritional supplement to their feed containing taurine. Feeding dogs with deep-frozen food or with a high proportion of plant-based proteins, for example, will mean that they require more taurine. In the case of large dogs, a taurine supplement in support of cardiac function is recommended.

Analytical contents: Raw Protein 68.7 %, Crude Ash 2.0 %, Crude Fibre <0.3 %, Crude Fat <1.0 %, Calcium 0,2 %, Magnesium 0,3 %.

Composition: Minerals.

Additives (vitamins): Taurine 980,000 mg/kg.

Feed recommendation:

Tierlieb Taurine can be given daily in order to supplement the feed. Mix the powder with wet food.

Cats: 2-3 heaped measuring spoons per day (400-600 mg) depending on the body size.

Dogs: 3 heaped measuring spoons per day for every 10 kg body weight.

Double the quantity can be fed in case of increased requirements or an existing taurine deficit.

Keep dry and out of direct sunlight. Store below 25°C.
