

Green-lipped Mussel Dog Capsules

Feed material for joints and cartilages

Good to know:

The "Green-lipped Mussel" (*Perna canaliculus*) contains so-called "glycosaminoglycans" (GAGs). These substances serve as structural components, among other things of the articular cartilages.

Composition:

Each capsule contains 500 mg New Zealand green lipped mussel concentrate 100% in full fat quality.

Analytical components:

66.8% crude protein, 10.5% crude fat, 6.8% crude ash, 1.1% crude fiber.

Additives	per kg	per capsule
Green-lipped mussel concentrate	1000 g	500 mg
- of which are glycosaminoglycans	30 g	15 mg
Gelatin	24 g	12 mg

Feeding recommendations:

For every 10 kg of body weight daily supplementation 1 capsule. This corresponds with

small dog breed	1 capsule
medium dog breed	2 capsules
large breed	3-4 capsules

Open the gelatin capsule and add the content to the feed.

Store in a dry place below 25°C. Protect from light.

Made in Gemany

α DE BW 117005

Contents 150 capsules = 73 g net
