

Hand-flattering Hand Cream

For velvety-soft, well cared hands.

This unusual hand cream is a wonderful gift for your hands! With its pleasantly light texture, valuable care components with argan oil, shea butter and allantoin and a subtle, fruity-fresh fragrance, it is the ideal support for delicate, velvety-soft hands. A highly-effective humidity regulator on a natural basis protects the skin against drying out. The cream absorbs quickly without leaving an unpleasant film behind. Using the practical Airless dispenser, the cream can be taken anywhere with you and applied easily and sparingly.
