

Organic Maca Powder

pure organic maca powder from the Peruvian Andes

Good to know:

The maca plant (*Lepidium meyenii*) belongs to the cress (*Lepidium*) genus. It is native to the heights of the Peruvian Andes, where it appears to withstand the wind, cold and aggressive UV radiation with ease.

Its tuberous roots have been highly valued as food for over 2000 years by the Incas. Recently, maca has also become popular in our latitudes.

Our Organic Maca Powder is gained from the dried roots of the maca plants, which are grown in line with controlled organic guidelines.

Ingredients:

100 % maca root powder from controlled organic cultivation.

Recommended dose:

Dissolve 1 teaspoon (approx. 5 g) of Organic Maca Powder 1 - 2 times per day in approx. 200 ml water or stir into food.
