

Argan Oil Body Butter

Pampers dry and sensitive skin over your whole body. The rich butter is absorbed well, leaving behind a luxurious, silky-soft feeling. Precious oils from argan, macadamia, kukui and jojoba nuts, combined with shea butter, provide a nourishing and protective care, primarily due to the active unsaturated fatty acids. This care is optimised by a special extract from the leaves of the argan tree. The delicate, natural fragrance allows you to experience the mysterious faraway country of origin of the exotic oils with your senses.
