

## Rose Cream

with shea butter and honey  
for normal, dry and sensitive skin

A creamy-rich, quickly absorbent care cream for normal, dry and sensitive skin. Opulent Rosa-Mosqueta oil from the seeds of the Chilean wild rose combined with mild almond and apricot stone oil nurtures the skin particularly gently and provides protection and regeneration. Shea butter and honey prevent the skin drying out and provide natural moisture. The beautifully-scented rose blossom extract and natural perfume oils round off the cream and make it an enchanting, fragrant experience.
