

## Anti-Wrinkle Narcissus Cream

The Narcissus extract contained slows down the metabolic processes of the skin thus making it aging more slowly and regenerate easier. The aging process and external factors are causes of dry skin, giving way to sagging skin and wrinkles. The special moisturizing factor contained in Anti-Wrinkle Narcissus Cream ensures that the skin is protected against the loss of moisture or that the lost natural moisture is replaced. Fresh wheat germ oil and vitamins C and E make this cream especially effective. Vitamin C activates collagen production and thus helps to reduce early skin aging and protect cells against the effects of free radicals. Contains as well the multifunctional ingredient Vitamin E that reduces skin redness and irritation and prevents the skin from becoming chapped, dry and wrinkly. Helps calm irritated skin, making it soft, smooth and supple.
